Office Action Summary	Application No. 10/601,565	Applicant(s) TSENG, MING-CHI	
	Examiner John J. Vrablik	Art Unit 3748	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings are objected to because recess 70 and holes 710, described on page 1 of the specification, are not shown. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: Page 9, line 11, "previously" should be --provide--; and line 20, --when-- should be inserted after "ceiling".

Appropriate correction is required.

Claim Objections

Claim 1 is objected to because of the following informalities: In line 1, --fan-- should be inserted after "ceiling"; in line 12, --be-- should be inserted after "to"; and in line 15, "buckle" should be --buckles--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by either Tseng (Fig. 2) or Liang (Fig. 6). Each of the references discloses a connecting assembly of a ceiling fan for fixing blades, comprising a connecting device adapted to be mounted to a motor of the ceiling fan, the connecting device including a seat (11 in Tseng and 12 in Liang) adapted to be attached to a bottom of the motor, the seat including multiple grooves (12 in Tseng and 104 in Liang) radially defined in a bottom of the seat and extending to an outer periphery of the seat, a channel (121 in Tseng and 128 in Liang) laterally defined in one side of each of the multiple grooves and laterally communicating with the corresponding one of the multiple grooves, a buckle (3 in Tseng and 118 in Liang) movably received in a corresponding one of the channels; and multiple brackets

Art Unit: 3748

(2 in Tseng and 200 in Liang) each having a first end inserted into a corresponding one of the multiple grooves and a second end adapted to be connected to a blade of the ceiling fan, each bracket having an indentation (22 in Tseng and 202 in Liang) laterally defined in the bracket for selectively partially receiving a corresponding one of the buckles to hold the bracket in place when the first end of the bracket is inserted into the corresponding one of the multiple grooves in the seat as claimed.

Allowable Subject Matter

Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tai (Fig. 5) shows a connecting assembly including a bracket (21) for a fan blade, the bracket having an indentation (24) for selectively receiving a buckle (40) to hold the bracket in place.
